SAYS MAN HAS
DESTROYED BULK
OF WORLD'S FORESTS

LONDON.—Bleached forest experts attending the Empire Forestry conference believed to a factual account that man has destroyed timber resources to a point where world-wide forests now is needed to save them.

L. C. Leake, wireless forester and delegate of the Empire Forestry Association, gave the findings of his organization.

Within 5,000 years man has destroyed at least two-thirds of original forest or twice as much of his land.

Foresters of Russia and Canada, with large resources, still have it their power to control the world's timber supply.

In Canada it was estimated that over 200,000 acres of forest land for commercial purposes trees are destroyed by fire, insects, diseases and other enemies.

A proposal by foresters for 'tabling' forest harvest in proportion to growth and thus maintain timber resources still may have to be applied generally.

The Forestry Association said Canada seems likely to continue in timber export as a timber export country rivalled only by Sweden and Finland. But Sweden now was forced to restrict its timber exports to maintain the present while Canada's exports are rising.

Londons Favor
Pastel-Colored Felts

LONDON.—Straw hats are still dominant in the lower price range, but there are plenty of pastel-colored felts for summer in pink, blue and navy blue as well as the popular pearl gray and stone.

The vogue for wide widths has established itself as a variation to the off-the-face style, and elliptical hats with faded or twisted brims is the new summer hat.

Picture hats in lightweight pastel for hats are just as picturesque as their counterparts in straw. These hats are always in demand as they can be worn successfully by most women although they require fairly long hair.

Long-striped often brings in the fresh, crisp-looking trimming used on the lower-priced hats. Sometimes it's twisted and twisted under a bonnet and then bursts out at the side into the hair, or sometimes from the halloon crown and dangles over the shoulder, or it may encircle the crown of a sailor's hat.

A quarter angle style is a delicately woven straw hat with a wide brim and folded rim sweeping down at the side into the hair, or sometimes from the halloon crown and dangles over the shoulder, or it may encircle the crown of a sailor's hat.

Plan New Towers
For Forest Service

VICTORIA.—The British Columbia Forest Service plans new observation towers on Mexican Mountain, near Vancouver Island, and at Elk Falls.

The towers are still in the planning stage, but because of present conditions, it is probable that materials no indefinite date can be set for construction.
